

E Ink Prism™

Color changing film for
architecture and design

Programmable Colors and Patterns

Rugged and Flexible

Low Power Consumption

E Ink Prism™ creates unique architectural experiences like never before. Manufacturers and designers now have the ability to integrate E Ink technology with traditional architectural products to create dynamic walls, ceilings, furniture, and habitats.

Bridging the gap between static and digital mediums, Prism enables endless experiential designs through a combination of changing colors, patterns, and user-defined programs. Transform airport terminals into living exhibits, expand the utility of corporate spaces, and increase retail and trade show foot traffic.

Prism is rugged and flexible allowing manufacturers and fabricators to cut, shape, and integrate with a wide variety of substrates. Its low power consumption reduces or eliminates the need for electrical outlets and enables alternative options such as batteries and/or photovoltaic cells.
